

Global Climate Change Australian Law and Policy

**NEW
TITLE**

David Hodgkinson &
Renee Garner

A comprehensive guide to climate change law and policy at the local, state and national level in Australia.

Global Climate Change: Australian Law and Policy is a comprehensive guide to climate change law and policy at the local, state and national level in Australia. The international framework established to deal with climate change is also examined in the book, together with frameworks in other non-Australian jurisdictions.

In writing the book the authors have drawn on legal sources including recent studies undertaken by government and non-government organisations, commissioned reports and journal articles, as well as academic studies. In addition, the authors have explored the physical science basis of climate change, the impact of climate change on human and biological environments, with a focus on Australia and the Pacific, and climate change mitigation and adaptation issues.

Subjects covered in the book include: carbon sequestration; climate change litigation; business, risk and climate change; emissions trading; carbon markets; and possible post-Kyoto climate change regimes.

About the Authors

David Hodgkinson - Special Counsel, Clayton Utz; Director, The Hodgkinson Group (Aviation and Climate Change Advisors); and Executive Director, EcoCarbon.

Renee Garner - Solicitor at Freehills and a member of Freehills' National Climate Change Steering Group. Renee has expertise in all aspects of climate change law, including emissions trading, energy and renewable energy major projects.

Important Features

- Examines both the legal and policy aspects of climate change in Australia
- Multi-disciplinary and multi-jurisdictional approach provides an integrated and nuanced understanding of climate change law and policy at all levels
- The avoidance of legal jargon makes it accessible to business, corporations and governments
- Detailed, up-to-date and complete coverage which is authoritative and timely
